Niewz

New Views on News.

FOR IMMEDIATE RELEASE

About Niewz.

Niewz is a vibrant, native RSS reader for iPhone, iPhone Duo, iPad and Mac. It brings the sites and blogs you choose into one place, with a reading interface you can make your own, smart feed organization, articles read aloud and no tracking.

Made for every Apple screen, including iPhone Duo.

On the foldable iPhone Duo, the list and the article sit side by side, and Full Page turns each page like a printed book.

Available now worldwide.

Hanoi, 17 November 2026. 8AMSTUDIO is preparing the release of Niewz, a new RSS reader for iPhone, iPad and Mac that brings together thoughtful design, deep personalization and a straightforward way to follow the news. Built for readers who choose their own sources and how they read, Niewz is a modern take on a familiar way to stay informed.

A familiar way to read, reimagined.

Niewz brings websites, blogs and other supported sources together in one place.
Readers can organize their subscriptions into colorful folders and choose between list, grid and Liquid Glass card layouts. Five reading themes, fifteen accent colors and four font styles let everyone shape the interface to their taste. Custom folder icons, feed colors and interactive Home Screen widgets for articles and folders make the reading space feel truly personal, on every screen.

More control over what you read.

Niewz supports OPML import and sync with FreshRSS, Miniflux and NewsBlur, so readers can easily bring their existing feeds into the app. Paste almost any address and Niewz finds the feed behind it, including YouTube channels, Reddit, Medium, Mastodon and GitHub. With Niewz Unlimited, it can even follow pages that have no feed. Listen reads articles aloud, one after another, so readers can catch up in a different way. With Niewz Unlimited, playback continues even while the screen is locked.

No subscriptions. No tracking.

Niewz is free to download and includes up to five active feeds, with every reading feature available. Niewz Unlimited removes the feed limit through a one-time in-app purchase, with no recurring subscription. The app requires no account. Feeds, folders and settings stay on the user's devices and in their own iCloud, and Niewz uses no advertising, analytics or tracking.

Made by two people who love reading.

8AMSTUDIO built the reader its team wanted: colorful, simple and respectful of readers' time. Niewz is made by a two-person team, a designer and a developer, who sweat every detail.
It speaks ten languages: English, Simplified Chinese, Hindi, Spanish, Arabic, French, Vietnamese, Brazilian Portuguese, Russian and Indonesian.

Availability and pricing.

Niewz is coming to the Apple App Store. The app is free, with Niewz Unlimited available as a one-time in-app purchase: $9.99 (€9.99 in the euro zone). Pricing varies by region.
